

# KEY FINDINGS FROM

# THE FOCUS SURVEY

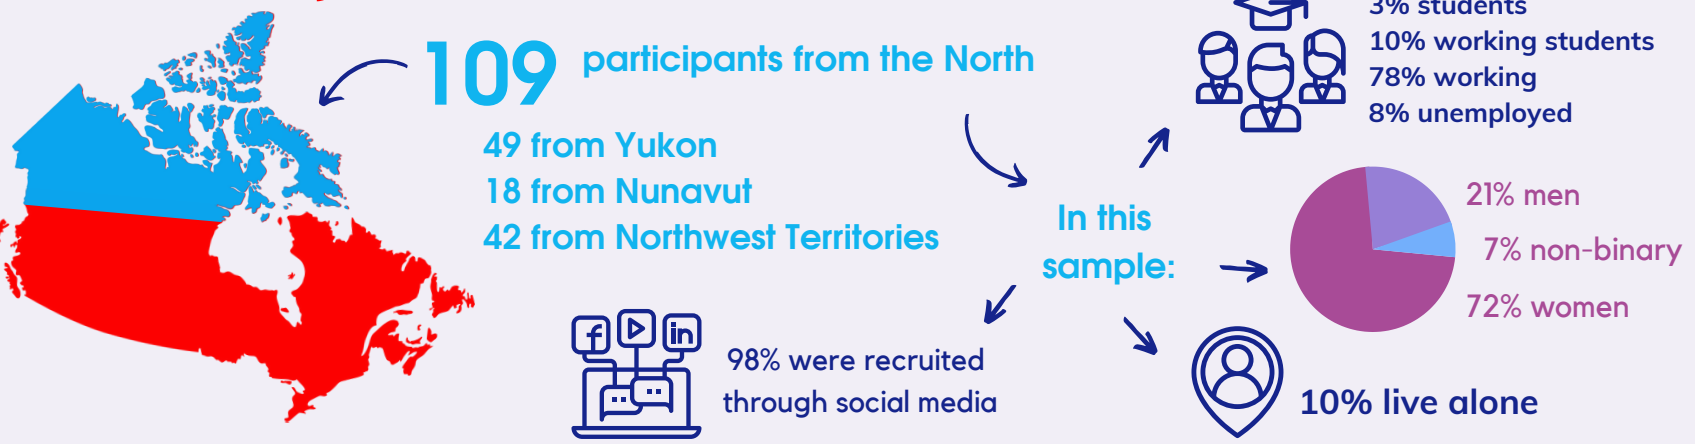

## Northern Territories - Canada

FOCUS is the France-Canada Observatory on COVID-19, Youth Health and Social Well-being

Thank you to all our participants!

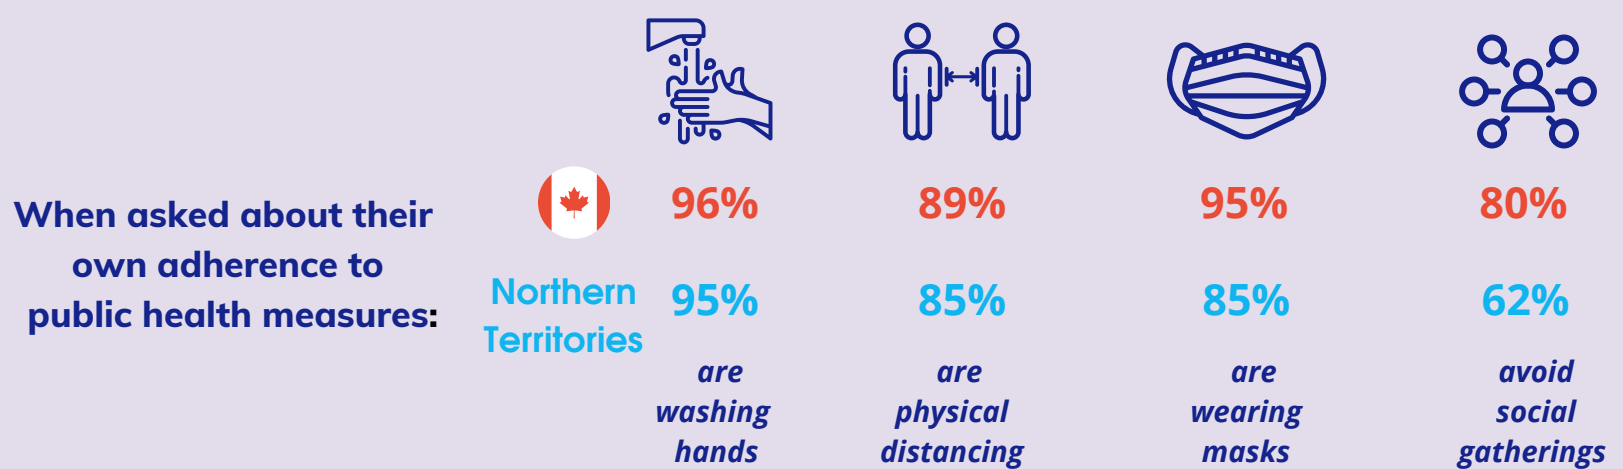

This infographic is based on data collected through an online survey between October and December 2020

In Canada, **3,931** young adults between 18 and 29 years old participated

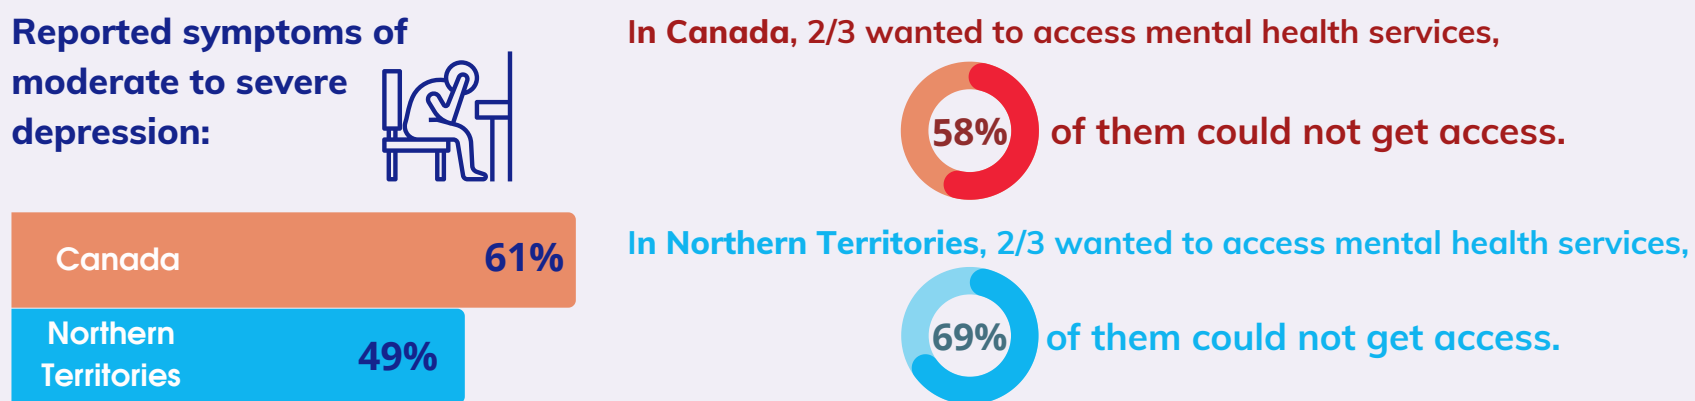

## COVID-19 PANDEMIC

**67%** participants in Northern Territories think that their government is paying **insufficient attention** to the needs and concerns of **young people**

## MENTAL HEALTH

**70%** of participants in Northern Territories reported feeling **lonely and stressed**

## SEXUAL HEALTH AND SUBSTANCE USE

## SOCIAL AND ECONOMIC CHALLENGES

Some differences between Canada and Northern Territories may be attributed to differences in our samples - we're currently conducting analyses to figure that out. If you'd like updates on our work, please follow us:
